Subject: Dimock GW Site - Lab Update

We are still on hold for the sampling at the Dimock GW Site. There was a high level meeting today so maybe we will here more on timing by the end of the day.

If there are no urgent issues we probably can do discuss this after our call tomorrow and I might have some more up-to-date information. If you have immediate questions I am available at 3:30pm EST to have a call.

I plan to send you an email with updated documents (Sampling Plan, Parameter list, etc.) so you should see that later today.

Cindy
